

Melee equipment

Welcome to my melee equipment guide! In this guide I will tell you about all the notable melee gear you can get in game. I will not go too in-depth on how to get certain items as most of them, especially the custom ones, are on our custom items guides which you can find on this wiki. I expect most readers of this guide have at least little knowledge of gear from (old-school) RuneScape and know that from the regular metals, bronze is the worst and rune is the best, and dragon is even better. I will not include items like this in my guide, but I will sometimes note them as a benchmark, and try to include as many notable items as possible. I will go through various sets, stand-alone pieces and weapons. Too much information? Scroll to the bottom of each section to find a TL;DR.

I will separate sets and independent items in this guide. Note that for most sets, you don't require a full set to have the bonuses shown, unless stated otherwise!

Sets

Barrows

Barrows set require 70 defence to wear and provide very good defensive stats. They consist of a helm, chest and legs. They also have weapons. There are 4 different sets, and combined with their weapons, they have a passive special attack as well. A full set is required for this built-in special attack. Verac's is considered the best barrows set all-round for pvm, due to it giving prayer bonus. Torag's has the absolute best defensive stats. Barrows melee sets do not offer any offensive stats. Dharok's set, combined with it's greataxe, increases your max by every hp you have lost, so the lower your HP, the higher you will hit. Verac's set combined with it's flail has a chance to ignore armour and protection prayers. Guthan's set combined with it's warspear has a chance to heal the player for a portion of the damage dealt. Torag's set combined with it's hammers has a chance to lower the victim's run energy by 25%. Torag's special attack is considered the absolute worst of all of them. The other sets each could provide a perk in certain situations. Despite broken barrows pieces being available (which can be repaired at barrows) contrary to RuneScape, the pieces won't break in combat. All items are tradeable.

Bandos

Bandos set requires 65 defence to wear, it provides mediocre defensive stats and a bit of offensive stats. It consists of a Chestplate, Tassets (legs) and boots. In most situations, Bandos is considered better than barrows sets, due to the strength bonus weighing more than the defensive stats.

Bandos boots don't provide a strength bonus, there are many other boots, such as dragon boots, that beats Bandos boots because of this. All items are tradeable.

Bandos (I)

Imbued Bandos is a RuneRealm custom set and requires 70 defence to wear, it provides the same defensive stats as regular Bandos but double the strength bonus, this makes it a very good choice for PVMing, many consider imbued Bandos as one of the best sets in the game, especially due to their value for money. Bandos imbued can be created by using a Bandos imbue scroll, which is

dropped by General Graardor, on a regular Bandos piece. All items are tradeable.

Attack bonus
Stab: 0.0
Slash: 0.0
Crush: 0.0
Magic: -36.0
Range: -17.0

Defence bonus
Stab: 169.0
Slash: 156.0
Crush: 171.0
Magic: -10.0
Range: 226.0

Other bonuses
Strength: 12.0
Prayer: 2.0

Melee maxhit: 12
Ranged maxhit: 11
Magic maxhit: ---

Justiciar

Justiciar set requires 75 defence to wear and consists of a faceguard, chestguard and legguards. It provides one of the best defensive stats in game, but lacks any offensive stats. It is the best non-custom set in terms of defensiveness. Justiciar drops from the Theatre of Blood. All pieces are tradeable.

Attack bonus
Stab: 0.0
Slash: 0.0
Crush: 0.0
Magic: -77.0
Range: -39.0

Defence bonus
Stab: 287.0
Slash: 285.0
Crush: 269.0
Magic: -36.0
Range: 311.0

Other bonuses
Strength: 0.0
Prayer: 10.0

Melee maxhit: 1
Ranged maxhit: 10
Magic maxhit: ---

Inquisitor

Inquisitor set requires 30 defence and 70 strength to wear, it consists of a helm, hauberk (chestpiece), and plateskirt. It is one of the best non-custom offensive set. It lacks good defensive stats, but its attack and strength bonuses make well up for that. Because of the 30 defence requirement, it creates a niche for 30 defence pures. Inquisitor pieces drop from the Theatre of Blood minigame. All pieces are tradeable.

Samurai

Samurai set is a RuneRealm custom made set that requires 70 attack to wear. It consists of a hat, chestpiece, legs, boots and gloves. It has below average defensive stats, but does offer very little attack bonus. When having a full set equipped, your melee attack speed is increased by 1 tick! This special effect makes it one of the best sets in the game! Despite it's lack of defensive stats, the speed increase makes it very strong, and useful in a lot of PVM situations. Unless high defensive stats, or hybrid items are necessary, samurai performs good in most situations, making the demand very high. Equipping a full set is required to have the speed boost, individual items do not give any special bonuses. It can be bought using blood money in the blood money shop at home, or bought from other players, as all pieces are tradeable.

Ethereal gear

Ethereal gear is a RuneRealm Custom made set that requires 70 defence to wear. It offers defensive stats comparable to barrows making it quite a tanky set. When a full set is worn in the wilderness, all damage done to you by monsters is reduced by 40% and players by 10%. These

items are dropped from the Ethereal Revenant, a custom boss. If you equip the full set against the Ethereal Revenant, its damage against you is also reduced by 40%, despite him not being in the wilderness. All pieces are tradeable.

Void

The Void set requires 42 defence, hitpoints, attack, strength, magic, and ranged, as well as 22 prayer to wear. While the set itself only gives a mediocre defence bonus, the full set gives a good invisible melee bonus. It is considered roughly as strong as regular Bandos. The void set can be obtained through the Pest Control minigame or bought from the Donator shop or Boss point shop at home. Elite void robes are a bit better than regular void robes as they give a slightly higher melee and prayer bonus, but they are not required for its full potential. They are not tradeable.

3rd age

3rd age requires 65 defence to equip and is a very rare expensive melee set. It's stats are a little lower than barrows sets, but its decent looks and rarity make up for that. It is only available as very rare drops through hard and elite clue scrolls, and it is also tradeable with other players. It is not used a lot in PVMing, but it is certainly a prestige set to have.

Slayer armour

Slayer chestplate and chainskirt are two custom items that require no stats to wear and will buff your damage done when killing monsters on a slayer task. If you are wearing any slayer armour piece or a slayer helm you will receive a 15% melee damage and accuracy buff. If you wear 2 pieces you get a total of 20% damage and accuracy boost and if you wear 3 items you will get a 25% damage and accuracy boost. As said before, having only one piece equipped will always give you 15% damage and accuracy boost. You can imbue all slayer armour pieces with the slayer imbue scroll to make the buffs work for ranged and magic damage and accuracy, as well as increase the base ranged and magic accuracy stats. To be eligible to buy these pieces of armour, you need have unlocked at least 25 items in the collection log of the following bosses: Alchemical Hydra, Cerberus, Ferocious Basilisk, Kraken, Thermonuclear Smoke Devil, Skotizo, and all Superiors slayer monsters. When you've done this, you can buy each piece for 750 points each in the slayer points shop.

Status

Status's armour is a RuneRealm custom set that can provide the best defence, and one of the best offensive stats in game. Status's set consists of a helm, platebody, and platelegs. Status comes in

6 different tiers, base, and tier 1 through 5. Base tier requires 60 defence to wear, tier 5 requires 99. All sets in-between have different defence level requirements. Note that in the table below, Staius's helm* is not taken into consideration compared to Bandos, as Bandos has no helm. Base Staius pieces drop from Crystal monsters, which can be found in the Revenants cave in the wilderness, the Super Donator zone, and the Super Sponsor zone. You can create higher tiers by upgrading the base tiers. 3 base tiers creates a tier 1 piece. 3 tier 1 pieces creates a 2 tier piece. You need 3 helms to create a higher tier helm, you can't mix pieces. A total of 243 base tier armour pieces are required to create a Tier 5 piece, making it one of the most tedious items to get. All pieces are tradeable.

Breakdown:

Tier	requirement strength	defence	attack
Base	60	defence Better than dragon	Good
1	70	defence worse than Bandos	Better
2	80	defence equal to Bandos	Better
3	90	defence worse than barrows	Better
4	99	defence better than justiciar	Better
5	99	defence Best in game	Almost as strong as Vesta
T5	Almost as strong as Vesta T5		

*Tier 5 helm is the best melee helm in game. Neitiznot Faceguard beats Tier 4 in terms of strength, but lacks defence. Tier 3 helm is equal to Magma helm strength and defence, but lacks a bit of offence against Magma helm.

The image displays 12 character models arranged in a 3x4 grid, each representing a different armor set. Each model is accompanied by a list of stats and a set of icons representing the armor pieces. The stats include Attack bonus (Stab, Slash, Crush, Magic, Range), Defence bonus (Stab, Slash, Crush, Magic, Range), and Other bonuses (Strength, Prayer, Melee maxhit, Ranged maxhit, Magic maxhit).

Model	Attack bonus	Defence bonus	Other bonuses
1	Stab: 3.0 Slash: 3.0 Crush: 4.0 Magic: -85.0 Range: -28.0	Stab: 81.0 Slash: 79.0 Crush: 69.0 Magic: -31.0 Range: 36.0	Strength: 1.0 Prayer: 0.0
2	Stab: 6.0 Slash: 6.0 Crush: 7.0 Magic: -70.0 Range: -22.0	Stab: 131.0 Slash: 128.0 Crush: 111.0 Magic: -25.0 Range: 133.0	Strength: 4.0 Prayer: 3.0
3	Stab: 10.0 Slash: 10.0 Crush: 12.0 Magic: -57.0 Range: -19.0	Stab: 197.0 Slash: 192.0 Crush: 167.0 Magic: -21.0 Range: 208.0	Strength: 5.0 Prayer: 6.0
4	Stab: 13.0 Slash: 13.0 Crush: 16.0 Magic: -41.0 Range: -13.0	Stab: 263.0 Slash: 256.0 Crush: 223.0 Magic: -14.0 Range: 277.0	Strength: 11.0 Prayer: 9.0
5	Stab: 17.0 Slash: 17.0 Crush: 22.0 Magic: -28.0 Range: -9.0	Stab: 329.0 Slash: 321.0 Crush: 281.0 Magic: -10.0 Range: 349.0	Strength: 17.0 Prayer: 12.0
6	Stab: 20.0 Slash: 20.0 Crush: 25.0 Magic: -13.0 Range: -3.0	Stab: 394.0 Slash: 385.0 Crush: 336.0 Magic: -4.0 Range: 418.0	Strength: 22.0 Prayer: 15.0
7	Stab: 10.0 Slash: 10.0 Crush: 12.0 Magic: -57.0 Range: -19.0	Stab: 197.0 Slash: 192.0 Crush: 167.0 Magic: -21.0 Range: 208.0	Strength: 5.0 Prayer: 6.0
8	Stab: 13.0 Slash: 13.0 Crush: 16.0 Magic: -41.0 Range: -13.0	Stab: 263.0 Slash: 256.0 Crush: 223.0 Magic: -14.0 Range: 277.0	Strength: 11.0 Prayer: 9.0
9	Stab: 17.0 Slash: 17.0 Crush: 22.0 Magic: -28.0 Range: -9.0	Stab: 329.0 Slash: 321.0 Crush: 281.0 Magic: -10.0 Range: 349.0	Strength: 17.0 Prayer: 12.0
10	Stab: 20.0 Slash: 20.0 Crush: 25.0 Magic: -13.0 Range: -3.0	Stab: 394.0 Slash: 385.0 Crush: 336.0 Magic: -4.0 Range: 418.0	Strength: 22.0 Prayer: 15.0
11	Stab: 10.0 Slash: 10.0 Crush: 12.0 Magic: -57.0 Range: -19.0	Stab: 197.0 Slash: 192.0 Crush: 167.0 Magic: -21.0 Range: 208.0	Strength: 5.0 Prayer: 6.0
12	Stab: 13.0 Slash: 13.0 Crush: 16.0 Magic: -41.0 Range: -13.0	Stab: 263.0 Slash: 256.0 Crush: 223.0 Magic: -14.0 Range: 277.0	Strength: 11.0 Prayer: 9.0

Vesta

Vesta's armour is a RuneRealm custom set and can provide the best offensive stats, and one of the best defensive stats in game. Vesta's consists of a chainbody and plateskirt. Vesta comes in 6 different tiers. Base tier requires 60 defence to wear, tier 1 70, going up each tier, up to T4 and T5, which both require 99 defence. Base Vesta pieces drop from Crystal dragons, which can be found in the Revenants cave in the wilderness, the Super Donator zone, and the Super Sponsor zone. You can create higher tiers by upgrading the base tiers. 3 base tiers creates a tier 1 piece. 3 tier 1 pieces creates a 2 tier piece. You need 3 skirts to create a higher tier skirt, you can't mix pieces. A total of 243 base tier armour pieces are required to create a Tier 5 piece, making it one of the most tedious items to get. All pieces are tradeable.

Tier	requirement strength	defence	attack
base	60	defence worse than dragon	Good
1	70	defence worse than dragon	Better
2	80	defence equal to dragon	Better
3	90	defence equal to Justiciar	Better
4	99	defence better than Justiciar	Better
5	99	defence Best in game	Best in game

Helms

Neitznot Faceguard

Neitznot faceguard requires 70 defence to wear and offers the 2nd best strength bonus for helms. It lacks good defensive stats but its strength bonus makes up for that. It can be created by combining a Neitznot helm and a Basilisk jaw, which drops from the Ferocious Basilisk, a custom boss. Both the helm and jaw are tradeable.

Magma Helm

Magma helm requires 75 defence and offers good strength bonus and good defensive stats as well. While its defence isn't as good as Justiciar helm, it beats Barrows helm and anything below. It will protect from venom and poison, and can be charged with Zulrah's scales to give a 25% chance to venom the target as well, making it a very strong helm for PVMing. It can be created by using a Magma Mutagen on a Serpentine helm. It is tradeable.

Slayer helm

Slayer helm has no requirements to wear. It offers mediocre defensive stats and no offensive stats. It offers a 15% boost to melee damage and accuracy when worn on a slayer task, making it the best helm to wear when doing a slayer task. A slayer helm can be made by combining a black mask with a slayer gem, nose peg, face mask, earmuffs and spiny helmet. Black mask drops from Cave horrors, all the other items are sold by the slayer masters. A slayer helm can be recoloured to many different colours by combining the helm with certain items dropped from bosses. A slayer imbue scroll can also be added to helmet to permanently upgrade it, giving the 15% boost to ranged and magic as well. The helm is not tradeable.

The regular and imbued regular slayer helm look different, the recoloured helms and it's imbued variant look the same.

Top left to right: Slayer helm > Imbued slayer helm > Black slayer helm (KBD heads) > Green slayer helm (Kalphite Queen Head)

Bottom left to right: Red Helm (Abyssal demon head) > Turquoise Helm (Vorkath head) > Purple

Attack bonus
 Stab: 0.0
 Slash: 0.0
 Crush: 0.0

Melee maxhit: 8
 Ranged maxhit: 11
 Magic maxhit: ---

Gloves

Ferocious gloves

Ferocious gloves require 80 attack and defence to wear and offer the best melee offense stats in the game. They do not give any defensive stats, but its attack and strength makes up a lot for that. When doing melee only PVM content, they are the absolute best choice. They can be made by combining Barrows gloves with Hydra Leather, which drops from the Alchemical Hydra. They are

not tradeable, but the Hydra Leather is.

Barrows gloves

Barrows gloves require 45 defence to wear and offer the best hybrid stats in the game. They are only beaten by Ferocious Gloves in melee stats, but they offer defensive stats while Ferocious gloves don't. They also give both ranged and magic offensive stats, making them a the best choice in situations where switching between multiple attack styles is necessary. Barrows gloves can be bought from certain custom (points) shops at home, and are also dropped by the Culinaromancer after completing the custom Recipe for Disaster quest. Barrows gloves are not tradeable.

Necklace

Amulet of Torture

Amulet of Torture requires 75 Hitpoints to wear and offers the best melee offense stats in the game. It beats any necklace in terms of attack bonus and strength. This amulet is the best choice when using only melee. It can be created through the crafting skill with a Zenyte gem. It is tradeable. A torture ornament kit can be added to the Amulet of torture, changing it's appearance.

Amulet of blood fury

Amulet of blood fury has no requirements to wear, is the best hybrid choice in the game and has a passive special attack. It gives good bonuses in all attack bonuses, defence and melee strength. It has a special attack where every time you deal melee damage, you have a chance to heal yourself for a portion of the damage you've dealt. This makes it a very good choice for endgame PVM content. The amulet of Blood fury can be created by using a Blood shard on an Amulet of fury. Blood shards drop from the Theatre of Blood. It is tradeable.

Amulet of fury gives the same bonuses as Blood fury, with the exception of its special attack. It can be created through crafting with an Onyx gem. An ornament kit can be added to the Amulet of fury, enhancing its looks. This does not affect its stats.

Ring

Commander Ring (I)

Commander ring requires 75 hitpoints to wear and offers the best hybrid stats in the game. It gives a large bonus to attack and defence stats as well as melee strength and prayer bonus. This is the best in slot ring for essentially all content, especially when using multiple combat styles. It can be created by combining one of each of the following rings: Berserker ring (I), Warrior ring (I), Seers ring (I), Archers ring (I), Treasonous ring (I), Tyrannical ring (I), Ring of the Gods (I), Ring of Suffering (I), and Brimstone ring. It can also be imbued by combining it with a Lucky ring (I) [obtained from completing Corporeal Beast collection log and adding the imbue scroll to a Lucky ring, which can be obtained from Superior slayer monsters]. When imbued the ring will offer the Lucky ring (I)'s additional +5% drop rate and a small chance to double monster drops, making it the undeniably best in slot ring which requires a lot of grinding. It is tradeable, but the imbued version is not.

Brimstone Ring

Brimstone ring has no requirements to wear and offers the second best hybrid stats in the game. It gives a bonus in all attack, defence as well as melee strength. Especially in endgame PVM content, when you're switching between different combat forms, this ring is the second best choice for an overall boost. It can be created by combining an Hydra's eye, fang and heart, all dropping from the Alchemical Hydra. It is tradeable.

Attack bonus
 Stab: 4.0

 Crush: 4.0
 Magic: 6.0
 Range: 4.0

Defence bonus
 Stab: 4.0
 Slash: 4.0
 Crush: 4.0
 Magic: 6.0
 Range: 4.0

Other bonuses
 Strength: 4.0
 Prayer: 0.0

Melee maxhit: 11
 Ranged maxhit: 11
 Magic maxhit: ---

Imbued rings

There are various rings that give a good bonus in a single stat, rather than multiple. They can all be strong in different situations. The regular forms of these rings drop from various bosses, and can be imbued by taking them to the Fountain of Rune of the wilderness. You need to pay 100k Blood money to imbue one ring, and a global message will be sent out when you imbue jewellery, so beware of pkers! Regular ring offer 4 stat bonus, while their imbued variant gives 8 stat bonus. Ring of the gods is an exception, giving one defence and 4 prayer points, and it's imbued variant gives 8 prayer points.

Name	Stat bonus	Dropped by
Berserker ring	Strength	Dagannoth Rex
Warrior ring	Slash	Dagannoth Rex
Tyrannical Ring	Crush	Callisto
Treacherous Ring	Stab	Venenatis
Ring of the Gods	Defence+Prayer	Vet'ion

Defence bonus
 Stab: 0.0
 Slash: 0.0
 Crush: 8.0
 Magic: 0.0
 Range: 0.0

Other bonuses
 Strength: 8.0
 Prayer: 0.0

Melee maxhit: 11
 Ranged maxhit: 11
 Magic maxhit: ---

Ring of suffering (I)

Ring of suffering has no requirements to wear and gives the best defence bonus in the game. It gives 10 defence points to all forms, while its imbued variant gives double. You can charge the Ring of Suffering with Rings of recoil, to recoil damage back to the target when you are being damaged. This effect plus its great defence makes it a very good choice in certain situations, when you get damaged a lot and extra damage is required. The Ring of suffering can be made through crafting with a Zenyte gem. It can be imbued at the Fountain of Rune, the same way as above stated rings. Charging a suffering with recoils changes its name to Ring of Suffering (R) or (RI). Ring of suffering is tradeable.

Cape

Prestige mastery cape

Prestige mastery cape requires you to have all your skills 99 and have prestiged them 10 times. It offers the best melee offensive stats, second to best defensive stats but no strength bonus. It does give a very high prayer bonus. It is beaten by the infernal (max) cape in terms of strength. The Prestige mastery capes has all perks from all of the skilling, trimmed skilling and mastery capes combined, making it the all-time best choice. See <link> for all the perks. The cape is not tradeable. It can be bought from the mysterious old man at home.

Prestiger cape

Prestiger cape requires you to have all your skills 99 and have prestiged them at least once. It offers the second to best offensive stats, third best defensive stats but no strength. It offers a high prayer boost as well. The Prestiger cape has all perks from all of the skilling and trimmed skilling capes combined. Due to these perks, it beats the infernal (max) cape in all-round terms. See [<Cape of Accomplishment guide>](#) for these perks. The cape is not tradeable. It can be bought from the mysterious old man at home.

Infernal max cape

The infernal max cape requires you to max all of your skills at least once. It offers almost the best melee offence, defence, and the best strength stats. It can be combined at the Prestige Guild or Sponsor zone, with a max cape, max cape hood, and infernal cape on the infernal max cape stand. The max cape also offer all of the perks from the non-trimmed skill capes, see [<Cape of accomplishment guide>](#) for these perks. The infernal cape is obtained by beating the Inferno

minigame or buyable in the PVP Tourny shop and Bounty Hunter shop. The cape is not tradeable.

Shield slots

Avernic defender

Avernic defender requires 70 attack and defence to wear and offers the best offensive melee stats for a shield slot. It gives very high attack bonus and strength. In most situations it is the best choice, unless using a shield is absolutely necessary. It can be created by using an Avernic defender hilt, which drops from the Theatre of Blood, on a dragon defender. It is not tradeable, but the hilt is.

Dragon defender

Dragon defender requires 60 attack and defence to wear and offers the respectively second and third to best attack bonus and strength. It is beaten a little bit by Dragonfire shield in terms of

strength, but its attack bonus makes up well for that. Dragon defender drops from the Cyclopes in the basement, after receiving a Rune defender, in the Warriors guild.

Divine spirit shield

Divine spirit shield requires 75 defence and 70 prayer to equip and offers very high defensive stats. It is beaten by Dragonfire shield by a little, but has a very strong passive bonus. It reduces incoming damage and drains prayer instead. This effect makes it a very strong shield for certain pvm situations. It can be created by using a Divine sigil on a blessed spirit shield, which are dropped by the Corporeal beast. It is tradeable.

Elysian spirit shield

Elysian spirit shield requires 75 defence and 70 prayers to equip and offers the same stats as Divine spirit shield. The Elysian spirit shield also has a passive effect, it has a 70% chance to reduce incoming damage by 25%, making it also one of the best shields. It can be made by using an Elysian sigil on a Blessed spirit shield, which are dropped by the Corporeal beast. It is tradeable.

Attack bonus
 Stab: 0.0
 Slash: 0.0
 Crush: 0.0
 Magic: 0.0
 Range: 0.0

Defence bonus
 Stab: 63.0
 Slash: 65.0
 Crush: 75.0
 Magic: 2.0
 Range: 57.0

Other bonuses
 Strength: 0.0
 Prayer: 3.0

Melee maxhit: 10
 Ranged maxhit: 11
 Magic maxhit: ---

Spectral spirit shield

Spectral spirit shield requires 75 defence and 70 prayers to equip. It offers a little less defensive stats than the other two spirit shields, but instead gives a +30 magic defence, making it an overall good choice an excellent when heavy magic is being dealt. It can be made by using a Spectral sigil on a Blessed spirit shield, which are dropped by the Corporeal beast. It is tradeable.

Attack bonus
 Stab: 0.0
 Slash: 0.0
 Crush: 0.0

Other bonuses
 Strength: 0.0
 Prayer: 3.0

Melee maxhit: 10
 Ranged maxhit: 11
 Magic maxhit: ---

Dragonfire shield

Dragonfire shield requires 75 defence to wear and offers one of the best melee defence in the game. It also gives a high strength bonus, almost the highest in game. The shield protects you against dragonfire, and it has a built-in special attack. Every minute, you can throw a fireball at your target, dealing heavy damage. Do this by right-clicking the shield when equipped and click operate. It can be made by using a Draconic visage on an Anti-dragon shield. A draconic visage is dropped by various high lvl dragons, where the Anti-dragon shield is sold by the general shop at home. It is tradeable.

V's shield

V's shield is a mediocre shield that requires 60 defence to equip. It gives okay defensive stats, but it will protect you against poison and venom, as well as halving the damage dealt to you by the Ferocious basilisk special attack. It is dropped by the Ferocious basilisk and is tradeable.

Dinh's Bulwark

Dinh's bulwark is a special two-handed shield that requires 75 defence to equip. It has the highest defensive stats in the game, crushing all of it's counterparts by many, many points. It is equipped by both hands, so you can not wear a weapon while having Dinh's bulwark equipped. It also offers a very high crush bonus, and a small strength bonus, enabling you do fight when equipped, although this item is mostly used in the wilderness to escape pkers. It is dropped in the Chambers of Xeric. It is tradeable.

TL;DR melee gear

Best offensive set (chest and legs) : Vesta T5 > Status T5 > Bandos (I) > Inquisitor > Bandos

Best defensive set(chest and legs): Status T5 > Vesta T5 > Inquisitor > Barrows > Bandos / Bandos (I)

Best Helm: Status T5 > Neitiznot Faceguard > Magma helm (*The latter is better in hybrid situations, or where (protection from) Venom is required. Slayer Helm is always the best choice on a slayer task, unless protection from venom is necessary*)

Best Boots: Primordial boots > Guardian Boots > Bandos Boots (I) > Dragon Boots > Bandos boots

Best gloves: Ferocious Gloves > Barrows gloves (*Ferocious offers the best melee stats, Barrows is the best choice in situations where you have to switch styles a lot*).

Best Necklace: Amulet of Torture > Amulet of Blood Fury > Amulet of Fury (*Torture offers the best offensive stats, Blood fury, due to it's passive healing, can be better in hard PVM situations such as Corporeal Beast or the Theatre of Blood*)

Best Ring: Commander Ring > Brimstone Ring > Ring of Suffering (RI) > Any imbued god ring > regular god ring (*Commander and Brimstone offer the best hybrid stats, while the imbued god only rings offer the best stats in their own area. Use Commander or Brimstone for doing high tier PVMing where several styles are used, and use one of the others if you only use a certain style. All of the rings can be swapped out for a Lucky Ring or Ring of Wealth (I) for the drop rate boost if no extra stats are necessary*).

Best cape: Prestige mastery cape > Prestiger cape > Infernal max cape > Fire max cape > Infernal cape > max cape > fire cape *Prestige mastery and prestiger cape are absolute best, due giving the perks of all skill, trimmed and skill master capes (Prestige mastery only gives skill master cape perks as well).*

Best Shield: > Avernic defender > Divine Spirit shield > Elysian Spirit Shield > Dragon defender > Dragonfire Shield > Spectral spirit shield > Dragon kite shield > Dragon square shield > Dinh's bulwark > Toktz-Ket-Xil (*Avernic and dragon defender respectively offer best offensive stats. If you don't need defence, use those. If you do need defence, use the shields. If fighting a dragon, use the Dragonfire shield. If fighting basilisks, use V's shield).*

Tank goes brrr

Weapons*

**There could be a chance that the max damage shown in the pictures is different than another weapon with higher or lower strength stat. This is due to me not having the same strength lvl the whole time. Note that higher strength = higher max hit and that shown max hit is always base (so modifiers such as stronger against certain type of monster is not taken in account yet).*

Scythe of Vitur

The Scythe of Vitur requires 75 attack and strength to wear and is considered the best melee weapon in the game. It's a two-handed weapon that doesn't necessarily have the highest stats, but it does three hits at once. The 2nd hit's maximum caps at half of the first, and the 3rd hit caps at a

maximum of the second. So if your first hit is a 20, your 2nd will maximum be a 10, and your 3rd hit maximum a 5. It is quite accurate and slays almost every monster quite easily. It is the best option in most pvm situations and therefore one of the highest, and most expensive looked after items. It drops from the Theatre of blood and is tradeable. Contrary to OSRS, it does not have to be charged.

Ominous Whip

the Ominous whip requires 90 attack to wear and is considered the strongest one-handed weapon in game. It has one of the highest strength and accuracy bonuses, combined with it's speed, it is considered the best one-handed weapon in game. The big advantage over Scythe is that you can wear a shield, making you more versatile if a shield is necessary, or a defender for even more accuracy. The Ominous whip can be created by combining a Serpentine, Lucified and Divine whip. These whips are made by using their respective mixes with an Abyssal whip, they currently only come from Event chest and Archangel/Archdemon boss. They are tradeable.

Fatal blade

Fatal blade requires 90 attack to wear and is one of the strongest one-handed longswords in the game. It has the highest strength and accuracy for a one-handed weapon, making it an excellent choice for PVMing. It is a little worse than the Ominous whip, due to its lower attack speed. It has a special attack where you hit the target 4 times with a low hit, and one very high hit, all in two ticks. It can be created by combining three different Fatal shards, which are dropped by the Ancient barbarian bosses, which are accessible after completing the Ancient barbarians quest. The shards and the Fatal blade itself are tradeable.

Ghrazi rapier

Ghrazi rapier requires 75 attack to wear and is a very strong one-handed weapon. It has very decent accuracy and strength, making it a great choice for PVMing. It is tradeable and dropped in the Theatre of Blood.

Divine/Lucified/Serpentine Whip

Above stated whips require 75 attack to wear and are considered very strong weapons. They have equal stats to the Ghrazi rapier and are also an excellent choice for PVMing. Combining these three can make the Ominous Whip. Currently, the whip mixes only come from the event chest and Archangel/Archdemon boss. They are tradeable.

Frozen/Volcanic Whip

Frozen and Volcanic whips require 70 attack to wear and offer decent attack stats. They are a little bit better than the Abyssal tentacle, but are not as strong as the Divine/Lucified/Serpentine whip. In OSRS they are only cosmetic, we've made them a bit stronger. The whip mixes can be obtained through various chests and boxes. They are tradeable.

Vesta's longsword

Vesta's longsword requires 78 attack to wear and has very decent stats. Its stats are comparable to

the Ghrazi rapier and is quite easily to obtain. They drop frequently from Crystal monsters, making it a frequently traded item between players, for a good price.

Armadyll godsword

Armadyll godsword is a two-handed sword and requires 75 attack to equip. It offers a very high attack bonus and equal strength. While it's not the best weapon to train with, due to its speed and lack of ability to use an off-hand item, it is a great special attack weapon, ripping through your opponents in both PvP and PVM as it boosts your accuracy and strength by 50% for that hit. Each spec costs 50% special attack energy. It can be obtained by creating a godsword through 3 godsword shards and an Armadyll hilt. The shards are dropped from all Godwars bosses and their minions, while the Armadyll hilt is only dropped by Kree'Arra and its minions. It is tradeable.

Dragon claws

Dragon claws is a two-handed weapon that requires 60 attack to equip. It offers a mediocre attack

and strength bonus. It is not a very good weapon to train with as a main weapon, but it has a great special attack. The special attack hits the target 4 times, where one hit is halved by the first hit, and the other 2 hits are a quarter of the first hit. For a example, if the first hit is 24. the other its would be 12 and 2 times 6. It's special attack is a very strong to use in both PvP and PVM. Each spec costs 50% special attack energy. It can be obtained as a unique drop from the Chambers of Xeric, or be traded with another player.

Dragon hunter lance

Dragon hunter lance is a one-handed weapon and requires 70 attack to wear and has decent stats. It does 20% extra damage against dragons, making it the best choice when killing dragons. It can be created by using a Hydra claw on a Zamorakian hasta. The lance is tradeable.

Dragon warhammer

Dragon warhammer is a one-handed weapon and requires 60 attack to wear. It has a high strength

and crush bonus but it is very slow. It is not used often in training, but it has a very strong special attack. It's special attack reduces the target's defence upon a successful hit, which makes it a very good complimentary weapon to bosses with very high defence, such as the Corporeal beast. Each spec costs 30% special attack. energy. It is quite an expensive weapon due to this, but also because it is a very rare drop, exclusively from Lizardman shamans. It is tradeable.

Staius's warhammer

Staius's warhammer is a one-handed weapon and requires 70 attack to wear. It has a decent strength and crush bonus but it is very slow. It is hardly used in combat training due to it's lack of speed, but has a strong special attack. It has the same special attack as Dragon warhammer, reducing the target's defence upon a succesfull hit. Apart from the stats, the main difference between Dwh and Swh is that Swh requires 50 special attack energy, allowing you to use it less often than Dwh. It is also less rare than Dwh, as it is a common drop from crystal monsters, this combined with it's lower stats and higher spec requirement, makes it a lot less valuable and therefore commonly used as a good alternative for Dwh. It is tradeable.

Zamorakian spear

The Zamorakian spear is a mediocre two-handed weapon that requires 70 attack to wear. While it does not have the best stats, it is the strongest weapon that ignores the Corporeal beasts damage reduction. Corporeal beast ignores 50% of the damage done to him, except when being damaged by a spear, therefore making the Zamorakian spear, the strongest spear in the game, arguably the best choice when fought against him. It is dropped by K'ril Tsutsaroth and his minions in the Godwars dungeon, and it also comes from the event chest. It is tradeable.

Viggora's chainmace

Viggora's chainmace is a one-handed weapon that requires lvl 60 attack to wear. It is the best weapon to use when in the wilderness. The chainmace has a 50% damage and accuracy boost when used in the wilderness, making it the best melee weapon to use inside the wilderness. It has to be charged by revenant ether, which drops, just like the chainmace, from revenant monsters in the Revenant cave in the wilderness. It is tradeable.

Arclight

Arclight requires 75 attack to equip. It is a very strong weapon against demonic creatures. It boosts your accuracy and strength by 70% when fighting demons, making it the strongest weapon to use against them. It can be created by upgrading a Darklight with Ancient shards. A darklight can be created by upgrading a Silverlight with Ancient shards. Silverlight is a unique drop from Skotizo. Ancient shards drop from various medium and high lvl monsters. It has low stats, making it not a very good weapon to fight other creatures with. It is tradeable.

TL;DR Weapons

Best two-handed weapon? Scythe of Vitur, due to doing three hits at once.

Best one-handed weapon? Ominous whip, due to it's incredibly accuracy and strength combined with it's speed.

Best weapons for early game? Vesta's longsword, Frozen/volcanic whip.

Best weapon against Corporeal beast? Zamorakian spear.

Best weapon against Dragons? Dragon-hunter lance.

Best weapon in the wilderness? Viggora's chainmace.

Best weapon against demons? Arclight.
